

ReWalkTM

Mobility Redefined

www.rewalk.com

Independent,

ReWalk™

- Past obstacles become challenges overcome; creating independence and igniting hope to inspire you, your patients and their families.
- Whether paralyzed for years or actively engaged in rehab, ReWalk promotes independent, self-directed walking and upright mobility.

Untethered Walking

"ReWalk has changed my daily activity level, changed my body, and improved my digestive system. To be able to stand face-to-face and walk independently has completely changed my life."

Agnes Fejerdy, age 35, 7 years post T11/12 motor-complete spinal cord injury

ReWalk is here today for your center

- **Research**

- > Top rehabilitation hospitals are beginning clinical trials to verify the health benefits associated with ReWalk for their patients, including studies of circulation, bone density, bowel and bladder function, and overall fitness improvement.

- **Therapy**

- > Other forms of therapy, including locomotion and body weight-supported treadmill systems can move the patient's body, but none can deliver the freedom, motivation, and independence experienced when a ReWalk-I user walks independently and untethered, alongside friend or family member.

- **ReWalk Training Centers**

- > The ReWalk-P allows users to stand face-to-face and walk independently in the community.* Established research and therapy sites will become Certified ReWalk Training Centers and listed on our ReWalk location finder at www.rewalk.com. Patients seeking ReWalk therapy or training, for ownership of the ReWalk-P, will be referred to the closest ReWalk Training Center.

*ReWalk-I is FDA listed for marketing in the USA. The ReWalk-P is considered investigational in the USA until cleared for marketing by the US FDA. Both ReWalk-I and ReWalk-P are CE marked for sale in Europe.

- **Rehab Centers**

- > To become a ReWalk research, therapy, or training center, visit our website at www.rewalk.com and fill out the contact form.

- **Patients**

- > To find your local ReWalk center, visit our website at www.rewalk.com
